Dry, warm and ready to work!

Winter won't hold you back with Almax Dehumidifiers.

"We generally use it overnight to keep the moisture out of the air, help doors dry, and keep the house warm. So, the next morning, if I need to sand, everything is dry and ready to go. You can just come in and start sanding straight away. Also, with paint, you know you won't get the drips and little runs."

– Corey, CDL Decorators

Suction Spray Guns draw the paint up from the cup by venturi action to the fluid tip.

If the paint is too thick or high viscosity it may not be able to be drawn up and a Gravity or Pressure Gun should be used.
